Election/Restrictions

1. Applicant's election without traverse of Group I, Species I (Figure 4A), Species A (Figure 3), in the reply filed on 6/03/2005 is acknowledged. Claims 1-4 are directed to elected Species. Non-elected claims 5-13 are withdrawn from consideration.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, the term "the gap being used for detecting temperature of the object" recited in lines 11-12, is indefinite because it is unclear. How can "the gap" detecting the temperature of the object? Clarification is required.

NOTE: For purpose of examination, it is presumed that "the gap being used for mounting a detecting temperature device to detect the temperature of the object"

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Sakagami (6,882,807). Sakagami discloses a fixing device comprising a holder (409); and a coil (403) for inductively heating the object (401), the coil (403) being composed of a plurality of turns of conductor forming a layer which is supported by the holder (409) and is positioned along the object (401), wherein a gap (G, figure below) is formed between conductor sections of the coil (403) through which electric currents respectively flow in the same direction, the gap (G) being used for mounting a temperature detecting device.(408).

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Takagi et al (US 2003/0062363) discloses a fixing device. Nakayama et al (US 2002/0039504) discloses an image heating apparatus of induction heating type.
